

INTERNATIONAL SCIENTIFIC JOURNALS

- 1. Stamatopoulos, C. A., Bouckovalas, G., Whitman, R. V. (1991). Analytical prediction of earthquake-induced permanent deformations". Journal of the Geotechnical Division, ASCE, 117 (10), pp. 1471-1491.
- 2. Bouckovalas, G., Stamatopoulos, C. A., Whitman, R. V. (1991). Analyzing the effect of partial drainage on earthquakes-induced settlements of foundations. Journal of the Geotechnical Division, ASCE, 117 (10), pp. 1492-1508.
- 3. Stamatopoulos, C. A. (1996). Sliding System Predicting Large Permanent Co-Seismic Movements of Slopes. Earthquake Engineering and Structural Dynamics, Vol. 25, pp 1075-1093.
- 4. Stamatopoulos C. A., Velgaki E. and Sarma S. (2000). Sliding-block back analysis of earthquake-induced slides. Soils and foundations, The Japanese Geotechnical Society, Vol. 40, No. 6, Dec., pp 61-75.
- 5. Stamatopoulos C., Petridis P., Bassanou M., Stamatopoulos A. (2005). Increase in horizontal stress induced by preloading. Journal of Ground Improvement, Thomas Telford Ltd, 9, No 2, pp 45-57.
- 6. Stamatopoulos C. A., Velgaki E. Modaresi A., Lopez-Caballero F. (2006) Seismic displacement of gravity walls by a two-body model. Bulletin of Earthquake Engineering, Springer, Volume 4 Number 3, 295-318.
- 7. Stamatopoulos C., A., Stamatopoulos A. C. (2007) Effect of preloading on the cyclic strength of reconstituted sand. Journal of Ground Improvement, Thomas Telford Ltd, Volume 11, Number 3, July. 145-155
- 8. Stamatopoulos C. A., Bassanou M., Brennan A. J., Madabhushi G. (2007). Effectiveness of anchors in mitigating the seismic motion near the crest of cliff-type topographies, Soil Dynamics and Earthquake Engineering, Volume 12, Number 12, 1082-1100.
- 9. Stamatopoulos C., Bassanou M. (2009) Mitigation of the seismic motion near the edge of cliff-type topographies using anchors and piles, Bulletin of Earthquake Engineering, Volume 7, Number 1, February, Pages 221-253.
- 10. Stamatopoulos C. (2009) Constitutive modeling of earthquake-induced slides on clays along slip surfaces". Landslides, Springer, Vol 6, No 3, 191-207.
- 11. Stamatopoulos C. (2010). An experimental study of the liquefaction strength of silty sands in terms of the state parameter, Soil Dynamics and Earthquake Engineering, Volume 30, Issue 8, August, Pages 662-678
- 12. Stamatopoulos C. A., Mavromihalis C, Sarma S.(2010). Correction for geometry changes during motion of sliding-block seismic displacement, ASCE, Journal of Geotechnical and Geoenvironmental Engineering, in press

Discussions

- 13. Stamatopoulos, C. A. (1996). Discussion of paper "Dynamic modeling and response of gravity soil-wall systems", by Veletsos/Younan, Journal of the Geotechnical Division, ASCE, Vol. 122, No. 7, pp 603-604.
- 14. Stamatopoulos C. (2005). Discussion of "High Overburden Stress Effects in Liquefaction Analyses" by Ross W. Boulanger, Journal of Geotechnical and Geoenvironmental Engineering, American Society of Civil Engineers, August, 1068-1059.
- 14. Stamatopoulos C. (2010). Discussion of "The effect of fines on critical state and liquefaction resistance characteristics of non-plastic silty sands " by Anthi Papadopoulou and Theodora Tika, Soils and foundations, The Japanese Geotechnical Society, Vol. 50, No 1.
